

A settled family *stays*.

Mobility teams, international schools and relocation partners use the guide to shorten the settling-in curve — and to reach families at the moment the assignment is offered, not the week they arrive.

OUR PROMISE

No personal data is collected from *your assignees*.

Like any website, our host keeps standard server logs, which include IP addresses, for security and troubleshooting only. We never use them to identify or track anyone.

The partner edition is a white-label version of the guide for your organisation, which we run as a hosted service. The people you send do not register, and we ask them for nothing: no name, no email address, no account. If your edition has a login at all, it is an organisation login that you issue, and it identifies your organisation, never a person.

HOW AN EDITION WORKS

- **Talk to us.** Tell us who you are, which city and how many people you send. A person replies; there is no automated sales funnel.
- **Your edition.** A white-label edition under your name, run by us as a hosted service. Add a welcome, your own policies and documents in front of the guide; they are labelled as yours and cannot change the guide itself.
- **Your people read it.** No registration and no personal details. If you want your edition closed to outsiders, it has an organisation login that you issue to your people.
- **Nothing about them is collected.** No names, no email addresses, no accounts, no individual reading history.

FOR MOBILITY AND HR TEAMS

- **From the offer letter.** Reach the family while the decisions are still cheap to change.
- **For the accompanying partner.** A whole section on community, purpose and belonging.
- **In their language.** English and Vietnamese first, five more to follow.

FOR RELOCATION COMPANIES

- **A guide worth handing over.** Verified, neutral, and re-checked monthly.
- **Never a competitor.** No logistics, no leasing, no assignment management.

WHAT IS NEVER FOR SALE

- A place in the guide, a higher position, your own description, or a ranking: schools are listed alphabetically.
